

Cromatos' mission is to transform every idea of colour into reality, supporting its customers in the implementation of the most ambitious projects and making available all the experience gained by its laboratory technicians, in over 25 years of activity to the customer.

To achieve this challenging goal, Cromatos develops every day in its production plants, new formulations of dyes, studied on the basis of customer needs and made with constant research of product innovation, control of the production process, respect for the environment and safety.

This Policy is based on a set of principles, identified by the Board of Directors and the General Manager to whom all corporate strategies refer and are inspired by the quality objectives.

Discover them with us:

QUALITY AREA

Pursue continuous improvement through:

-  Definition of measurable objectives and indicators that allow its control and management;
-  Constant focus on products customization for customers;
-  Timely response to customers with short lead times;
-  Constant product and process research in order to keep up with competitiveness on national and foreign markets;
-  Compliance with the applicable mandatory legislation and any voluntary regulatory compliance required by customers;
-  Promotion and expansion of reference markets towards the product end user, in perspective of a constant increase in turnover;
-  Involvement promotion, awareness and training of staff regarding the quality of their work and that of the reference processes in a perspective of internal and external customer satisfaction;
-  Corporate Social Responsibility principles Promotion, through Model 231 adoption.

SECURITY AREA

Prevent and reduce workers' health and safety risks in the perspective of continuous improvement, through:

-  Choice of raw materials, materials in general, methods and technologies that, as far as possible, do not expose personnel to risks (risk prevention in the design phase);
-  Creation and maintenance of suitable working environments, safe and healthy in order to prevent work-related injuries and illnesses;
-  Protection of workers' health through continuous health monitoring and its evaluation;
-  Activation of effective measures in order to prevent accidents through the elimination of hazards and the reduction of health and safety risks;
-  Commitment to the constant satisfaction of applicable legal requirements and voluntary ones eventually subscribed;
-  Commitment to worker consultation and participation through their representative (RLS) in operational choices regarding health and safety.

ENVIRONMENT AREA

Commitment to environment protection, including pollution prevention in the perspective of continuous improvement, through:

-  raw materials constant research with low environmental impact;
-  Use of wastewater treatment plants, in order to reduce emissions into the environment. Use of air treatment plants, in order to reduce emissions into the atmosphere;
-  Production of energy from renewable sources
-  Compliance with applicable environmental regulations and any voluntary agreements signed.
